

# Software Requirements Specification

## Untitled App

Project ID: SRS-UNTITLED-APP | Status: approved | Generated: 2026-04-24

### 1. Introduction

This document defines the functional and non-functional requirements for Untitled App.

A simple school app for teachers to upload lesson files, ask students questions, and generate an IEEE SRS document.

### 2. Core Features

#### FEAT-001 - General answer

The platform provides general answer as part of the main workflow.

REQ-011: The system shall support general answer through the primary interface.

REQ-012: The system shall display general answer history and status to authorized users.

#### FEAT-002 - Multimodal project intake

The platform provides multimodal project intake as part of the main workflow.

REQ-021: The system shall support multimodal project intake through the primary interface.

REQ-022: The system shall display multimodal project intake history and status to authorized users.

#### FEAT-003 - AI-guided requirement interview

The platform provides ai-guided requirement interview as part of the main workflow.

REQ-031: The system shall support ai-guided requirement interview through the primary interface.

REQ-032: The system shall display ai-guided requirement interview history and status to authorized users.

#### FEAT-004 - Structured SRS generation

The platform provides structured srs generation as part of the main workflow.

REQ-041: The system shall support structured srs generation through the primary interface.

REQ-042: The system shall display structured srs generation history and status to authorized users.

### 3. Validation Summary

Status: ready | Completeness: 100
