

Software Requirements Specification

Task Manager

Project ID: SRS-TASK-MANAGER | Status: approved | Generated: 2026-04-24

1. Introduction

This document specifies the functional and non-functional requirements for the Task Manager application, providing a complete definition of system capabilities, user interactions, and technical specifications to guide development and ensure stakeholder alignment.

A cross-platform task management application that allows users to create, organize, and track tasks with reminder functionality, file attachments, and comprehensive reporting capabilities for personal and academic productivity.

2. Core Features

FEAT-001 - Task Management Core

Comprehensive task creation, editing, organization, and tracking capabilities with support for categories, priorities, and status tracking

REQ-011: The system shall allow authenticated users to create new tasks with title, description, due date, priority level, and category assignment

REQ-012: The system shall provide organizational features including categories, tags, and filtering options for efficient task management

FEAT-002 - File Attachment System

Secure file upload, storage, and management system for attaching documents, images, and other files to tasks

REQ-021: The system shall support file uploads up to 25MB per file with common document, image, and archive formats

REQ-022: The system shall provide file management capabilities including preview, download, and deletion of attached files

FEAT-003 - Notification and Reminder Engine

Automated reminder system delivering timely notifications through multiple channels based on task due dates and user preferences

REQ-031: The system shall deliver real-time notifications within the application interface for upcoming tasks and reminders

REQ-032: The system shall send email reminders for important tasks based on user-configured preferences and timing

FEAT-004 - Reporting and Export System

Comprehensive reporting capabilities with data export functionality for task analysis, productivity tracking, and external use

REQ-041: The system shall generate detailed reports on task completion, productivity metrics, and user activity

REQ-042: The system shall support export of task data in multiple formats including JSON, CSV, and PDF for external use

3. Validation Summary

Status: ready | Completeness: 100
