

Software Requirements Specification

Untitled App

Project ID: SRS-UNTITLED-APP | Status: approved | Generated: 2026-04-24

1. Introduction

This document specifies the functional and non-functional requirements for the Task Management Application, providing a complete specification for development, testing, and implementation.

A web-based task management system that allows business owners and administrators to organize, track, and manage tasks with due date notifications and payment integration capabilities.

2. Core Features

FEAT-001 - Task Management Core

Comprehensive task creation, modification, deletion, and retrieval functionality with persistent storage

REQ-011: The system shall allow authenticated users to create new tasks with title, description, due date, and priority fields

REQ-012: The system shall provide secure task deletion with confirmation prompts and audit logging

REQ-013: The system shall support viewing, searching, and filtering tasks by various criteria including status, due date, and priority

FEAT-002 - Notification System

Automated due date notifications and reminders for upcoming and overdue tasks

REQ-021: The system shall automatically notify users of tasks approaching their due dates and overdue tasks

FEAT-003 - Payment Integration

Integration with external payment services for task-related financial transactions

REQ-031: The system shall integrate with external payment services to process task-related payments

3. Validation Summary

Status: ready | Completeness: 100
