

Software Requirements Specification

Untitled App

Project ID: SRS-UNTITLED-APP | Status: approved | Generated: 2026-04-24

1. Introduction

This document specifies the functional and non-functional requirements for a project management application that enables small teams to manage tasks, set reminders, control access based on roles, and export project data to PDF format.

A web-based project management solution for small teams (under 100 users) featuring task management, reminder system, role-based access control, and PDF export functionality.

2. Core Features

FEAT-001 - Authentication System

Secure user authentication and session management using email and password

REQ-011: The system shall allow users to authenticate using valid email and password credentials

REQ-012: The system shall support password reset functionality

FEAT-002 - Project Management

Comprehensive project and task management capabilities

REQ-021: The system shall allow authorized users to create new projects

REQ-022: The system shall support creating, assigning, and tracking tasks within projects

FEAT-003 - Reminder System

Automated notification system for deadlines and important events

REQ-031: The system shall automatically send reminders for upcoming deadlines

REQ-032: The system shall notify users when they are assigned new tasks

FEAT-004 - Role-Based Access Control

Secure access control based on user roles and permissions

REQ-041: The system shall allow administrators to assign and modify user roles

REQ-042: The system shall enforce access restrictions based on user roles

FEAT-005 - PDF Export

Generation and download of project reports in PDF format

REQ-051: The system shall generate PDF reports for projects and tasks

REQ-052: The system shall allow users to download generated PDF reports

3. Validation Summary

Status: ready | Completeness: 100
