

Software Requirements Specification

Task Manager

Project ID: SRS-TASK-MANAGER | Status: approved | Generated: 2026-04-24

1. Introduction

This document specifies the functional and non-functional requirements for the Task Manager application, providing a complete definition of system capabilities, user interactions, and technical specifications to guide development and implementation.

A cross-platform task management system that enables users to create, organize, and track tasks with reminders, file attachments, and comprehensive reporting capabilities.

2. Core Features

FEAT-001 - Task Management

Comprehensive task creation, editing, organization, and tracking capabilities

REQ-011: The system shall allow users to create tasks with title, description, due date, priority level, and category

REQ-012: The system shall provide categorization and filtering options for task management

FEAT-002 - File Management

Secure file upload, storage, and attachment to tasks

REQ-021: The system shall allow users to upload files and attach them to specific tasks

REQ-022: The system shall ensure only authorized users can access uploaded files

FEAT-003 - Notification System

Automated reminders and notifications via multiple channels

REQ-031: The system shall send email reminders for upcoming and overdue tasks

REQ-032: The system shall send text message reminders via SMS or WhatsApp

FEAT-004 - Reporting and Export

Comprehensive reporting and data export capabilities

REQ-041: The system shall generate task completion reports with various filters and time periods

REQ-042: The system shall allow export of reports and task data in multiple formats

3. Validation Summary

Status: ready | Completeness: 100
